

PROGRAM: BACHELOR AND LICENSE OF PHARMACY

Program Focus **Recommended Major:** Pharmacy

Duration: 4 years (8 semesters)

Level of study: **Bachelor**

Description:

The Pharmacy program of study consists of 8 semesters, each containing 6 theoretical-practical courses per block; our program is designed in such a way that our students can make the most of each of the courses in the 23 weeks of lessons and also optimally endure with the entire block.

We have differentiating subjects, which are taken from the second semester, some of these subjects are: Pharmacotechnics, clinical and pathophysiological pharmacy, community pharmacy, community health and disaster management, among others.

From the first semester of the program, students will have the experience of acquiring knowledge from our simulation center, also from the third semester our students have the possibility of applying to work internships, where they can gain work experience in the pharmaceutical field; An outstanding point of our program is attributed to the 100% practical internship that students do in the eighth semester (last of the program).
