

UCIMED

PROGRAM: **BACHELOR OF HEALTH SCIENCES AND BACHELOR OF MEDICINE AND SURGERY**

Program Focus  
**Recommended Major:**  
Medicine

Duration:  
**5 and a half years**  
(11 semesters)

Level of study:  
**Bachelor**

**Description:**

The Medicine study program is made up of 11 semesters, each one containing approximately 5 courses per block; our program is designed in such a way that our students can get the most out of each of the courses in the 23 weeks of lessons and also optimally cope with the entire block. In the last year they do the internship.

We adopt innovative trends in line with the best Universities in Health Sciences in the world and this makes us the only University in the Central American region to use the tool provided by Kaplan Medica, for all students from II to IX Semester, as well as its teachers, thus allowing a more analytical and practical teaching methodology, less memory.

Starting in 2023, all graduates who wish to opt for a specialization or job opportunity in the United States must come from an internationally accredited medical school, aware of the importance of receiving accreditation, we underwent the evaluation process and after exhaustive reviews, the Mexican Council for the Accreditation of Medical Education, an entity authorized by the World Federation for Medical Education, granted us international accreditation in 2020, which makes us the first public and private University to receive this recognition in Central America, South America and the Caribbean.
