

PROGRAM: **BACHELOR OF PHYSIOTHERAPY**

Program Focus
Recommended Major:
Physiotherapy

Duration:
4 years

Level of study:
Bachelor

Description:

Each semester is made up of 5 to 6 subjects, ranging from basic sciences, such as anatomy, physiology, biology and others, to more advanced subjects such as hospital clinical practice, electrotherapy and kinesiotherapy, completing a total of 38 courses.

We are the only School of Physiotherapy in Costa Rica that has 4 semesters of clinical practice (2 years) that cover all areas of pediatric, geriatric, orthopedic, hospital, clinical, business and sports physiotherapy.

In addition, we have innovative subjects that facilitate obtaining employment for our graduates, these subjects are:

- Orthopedic manual therapy.
- Physiotherapy in specialized areas.
- Physioesthetics.
- Electrotherapy.
- Exercise and physical activity.
- Management and administration of health services.
- Research in physiotherapy.

Our plan is designed so that students in their last semester only undertake a practical internship, which facilitates their rotation abroad with the Universities with which we have agreements, including Hennepin County in Minnesota EU and UPAEP in Puebla Mexico.
