

COSTA RICA GLOBAL LEARNING PROGRAMS

PROGRAM: VIRTUAL INTERNSHIP

Program Focus
Recommended Major:
All

Duration:
10 weeks
(140-250 hours)

Level of study:
Associate, Bachelor,
or Master level

Description:

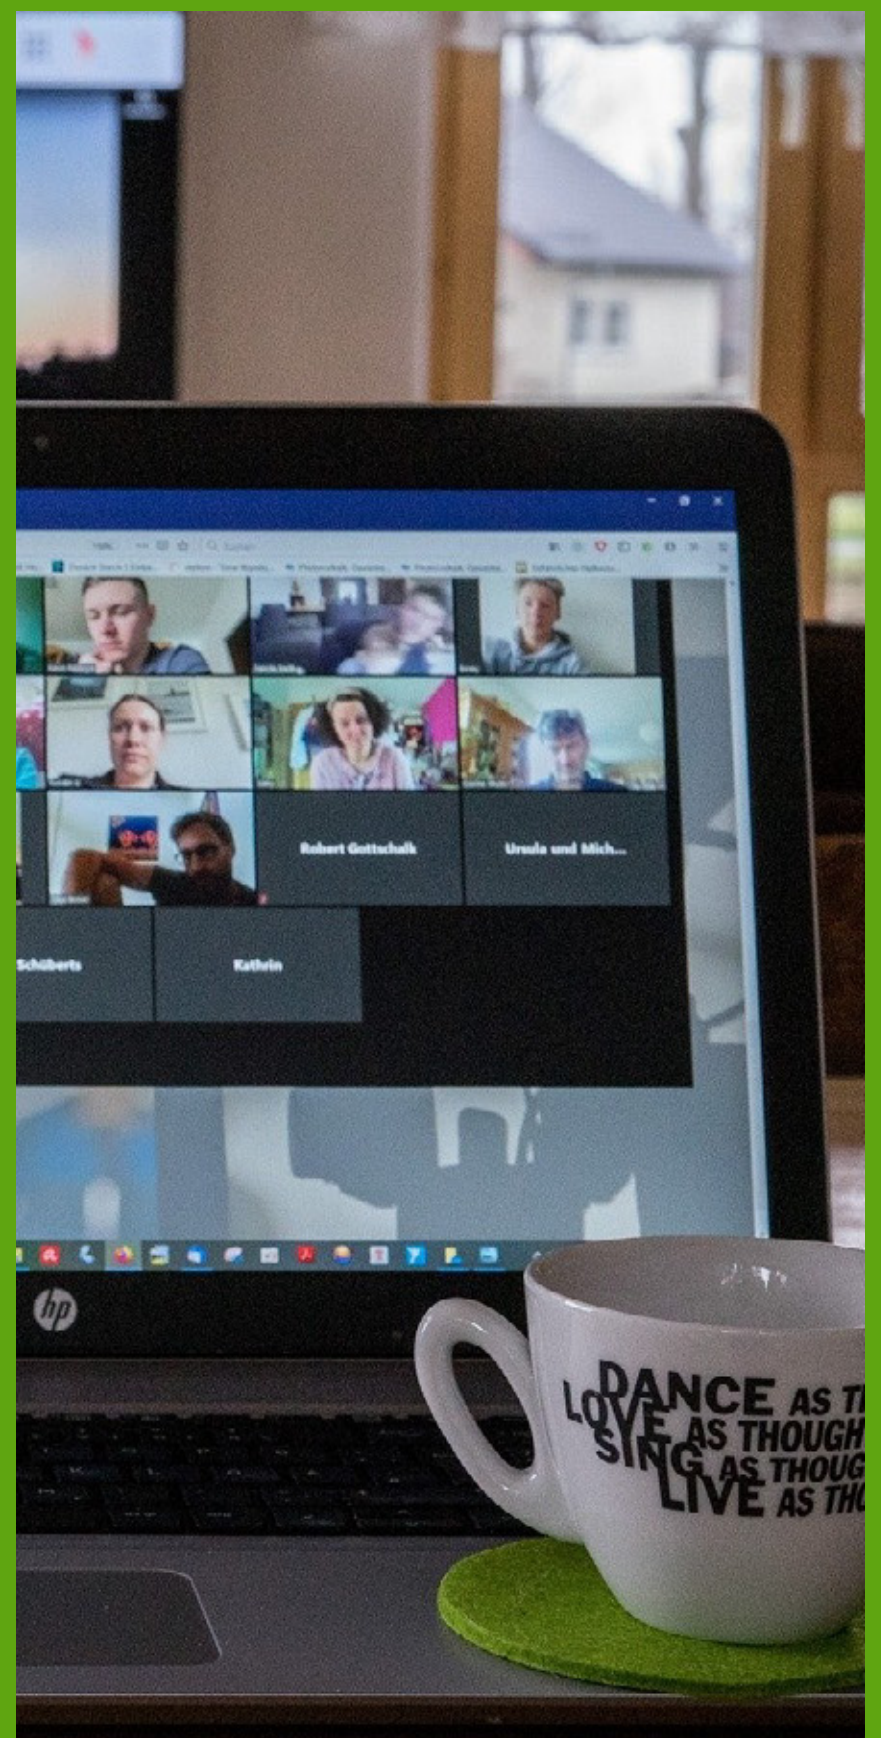

Our virtual internship abroad provides students with many of the same opportunities as any work experience: engagement in real-world projects, hands-on experiences, skill development, professional connections, and more.

In addition, an international virtual internship also gives participants experience with communicating across different time zones, cultures, and languages.

Like most intern experiences, interns will be expected to work on projects a certain number of hours per week, be assigned a mentor who will guide and answer their questions, attend meetings and trainings, and complete assigned tasks.

Our virtual interns will also be given guidance and training through workshops and modules before, during, and after their internship that will allow them to develop their soft skills and personal competencies and help them to thrive as a remote worker.

In addition, students will have access to a cultural mentor who will answer their questions about Costa Rica and will also engage in virtual cultural activities with Costa Ricans and their intern peers such as language, cooking, and dance classes.
