

INSTITUTO TECNOLÓGICO DE COSTA RICA

PROGRAM: **MECHATRONICS ENGINEERING**

Program Focus
Recommended Major:
Engineering

Duration:
5 years

Level of study:
Licenciatura

Discipline:
Engineering

Language:
Spanish

Description:

It is an integrative discipline of electromechanics, electronics, computing and control systems, whose knowledge and application combine several fields. Its object of study is focused on providing comprehensive, intelligent, flexible and functional systems that allow the creation of versatile, economical, reliable, simple products in harmony with the human being and the environment.
